CLARESHOLM, ALBERTA, FRIDAY, OCTOBER 9, 1925

Number 41

The Men's and Boys' Cash Store

To my Friends and Patrons:

I wish to announce that I will be home in a few days to attend again personally to my business, and hope to be favored with your patronage. Have been absent on account of my wife's sickness for the past two months in a Spokane hospital.

C. J. BRAREN

CLARESHOLM LOCAL NEWS

Born, October 3rd, to Mr. and Mrs. F. R. Keer, a son.

A tea will be held by the Girl Guides at the Parish Hall on Saturday, October 17.

Mr. Farmer, join the Wheat Pool today. The Local Committee's forms can be obtained from J. W. Haller.

Mrs. L. C. Cramer went to the hospital at Calgary last week where she underwent a serious surgical operation.

Pleasant Peppy Pastime at the Saturday night dance, Oct. 10th, 8 to 11:45 p.m. Admission, gents 75 cents, ladies free.

Treat your sweet tooth to home made candy and popcorn balls at the Girl Guide's tea at the Parish Hall on Saturday the 17th.

The Review is glad to be able to state that Mrs. Carl Braren, who has been seriously ill in a hospital at Spokane, is reported to be improving.

The first of a series of Saturday night dances will commence Oct. 10th, in the Odd Fellows' Hall. Dancing 8 p.m. to 11:45 p.m. Admission, gents 75 cents.

There has been more snow during the last week, with some cold days and some fine days, also cold nights. The snow is gradually disappearing and farmers look forward to resumption of threshing in due time.

"Lord Chumley" with Viola Dana, Raymond Griffith and Theodore Roberts, at the Rex theater Friday and Saturday nights this week. This picture is adapted from the play "Lord Chumley" by David Belasco and Henry C. DeMille.

Hon. Charles Stewart, Minister of the Interior, will address a public meeting in the interest of T. C. Miles, Liberal candidate for the Macleod constituency, at the Rex theater, Clareholm, on Saturday afternoon, October 10, at 2:30 o'clock. Come and hear the campaign issues ably presented.

The snow storm caught many with their potatoes still in the ground. The heavy covering of snow has so far prevented freezing, however, and though digging potatoes in the snow is an unpleasant job, good progress has been made during the past week in getting the potato crop harvested.

Attention is called to the announcement of Miss Wilma A. Palmer, teacher of piano and violin, who has opened a studio at her home. She is one of the successful pupils of Mr. McE. Young of Lethbridge, and is prepared to teach the latest methods. Pupils of hers were successful at recent examinations.

Rev. W. C. Marsh preached in St. Gabriel's church, Calgary, on Sunday morning, and was formally inducted at the evening service by Rev. Canon Robinson, acting for the Bishop who was ill. Mr. Marsh preaches his farewell sermon here on Sunday, after which he will leave to take up his residence in Calgary.

The second bridge party of the series given by the ladies of the Catholic church will be held in the Parish Hall next Thursday, the 15th inst., at 8:30. The first at the Queen's Hotel, October 1st, was a great success, thanks to the many patrons, there being ten tables. The prizes were won by Mrs. J. Reynolds and Mr. W. Moffatt. Everyone is welcome and invited.

The Rev. H. D. Marr, B.A., district secretary for the Bible Society, will visit Clareholm for the coming Sunday, and will speak at the morning service in St. Andrew's church. This visit is in connection with the 40th anniversary of the Tyndale version of the English Bible, the first translation of the Bible into the English language. Mr. Marr's visits and addresses are always heard with great pleasure by the people of Clareholm. His evening address in Bethel church will be illustrated with special lantern slides.

If you are not registered for the forthcoming election, see that your name gets on the list this week, by October 10th. C. E. Moore is registrar for Best Clareholm polling division, and Wm. Miller for West Clareholm. Both will be found at C. E. Moore's office, in the old Reinecke drug store building.

Special harvest services will be held at St. John's church on Sunday next, October 11, as follows: 8 a.m., holy communion; 11 a.m., morning service; noon, children's service in the church; 7:30 p.m., evening service. Rev. W. C. Marsh will preach at both services, these being his farewell services as pastor of St. John's. The morning subject will be, "The Kindness of God," while in the evening Mr. Marsh will speak on "A Pastor's Benediction." The Scouts and Guides will attend the evening service in uniform. A very cordial invitation is extended to all to attend these services.

The Turkey Dinner

In Clareholm one Saturday night a little excitement was craved, and so mysteriously were seven turkeys

In the bottom of a buggy laid.

A turkey or two was given away. And this gave away the men too. However next Sunday at their dinner

The turkeys they endeavored to chew.

Eight men and the boss were arrested, For eating and receiving stolen goods.

So it seems that now we need inquire

The procuring of all our foods.

Before two judges, you know how it goes.

The police, and the rest of the ornaments,

The trial proceeded; a hot time ensued.

Some trying to make, some have expense.

Some men were tipsy, others not quite,

Witnesses were questioned, it all took time.

The judges consulted, others were anxious

To hear of numbered days or a fine.

Judges to pay, the costs too of course,

The price of the turkeys, but for that matter,

One man said it would be worth it if only the turkeys had been fatter.

Eleven dollars and five cents was asked

Of each of the men, innocent or sinner.

But you will agree with me in this:

'Twas a rather expensive turkey dinner.

Now they realize turkey dinners are expensive.

Though a hundred is but a cool little sum.

But they had better try something different.

The next time they want any fun.

IN THE DISTRICT COURT OF THE DISTRICT OF MACLEOD

In the Estate of David Williams, formerly of Clareholm in the Province of Alberta, latterly of Walla Walla in the State of Washington, United States of America, Farmer, deceased.

Notice is hereby given that all persons having claims upon the estate of the above named David Williams, who died on the 22nd day of September A.D. 1924, are required to file with the undersigned J. R. Watt, Solicitor for the Administrator, by the 30th day of November A.D. 1925, a full statement of their claims and of any securities held by them, and that after that date the Administrator will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to his knowledge.

Dated this 23rd day of September, A.D. 1925.
J. R. Watt,
Solicitor for Clyde H. Curtis the Administrator.

"LORD CHUMLEY"

with Viola Dana, Raymond Griffith and Theodore Roberts.

From the play "Lord Chumley" by David Belasco and Henry DeMille.

A Paramount Picture

Canada Must Hold Fast To Link That Welds Together Component Parts Of Empire

Severing of some of the old ties of the British Empire is natural and necessary progress, but few in Canada think on that account that the empire is disintegrating, said Sir George Paice, in a public address at Victoria.

"Some people say it would not make any difference if the empire was a republic and headed by a president or a monarch headed by a King," Sir George added.

"But the British Empire, scattered as it is over the surface of the world and composed of races and tribes of all colors and beliefs, is held together by that common sovereignty of ours. It is a symbol of sovereignty that has made the British Empire what it is, and we must hold fast to that link that welds into a whole all the scattered parts of the empire."

Protecting Caribou Herds

Indian Department Will Take Steps to Prevent Extirpation

Even as the buffalo, so also the mighty herds of caribou that roam the great lands of Northern Saskatchewan will be decimated.

Today they are found literally in millions, official reports have come from that country about Redoubt Lake, which states one of the great herds will take days to pass a given point in mass formation.

The caribou is practically the living of the Indians in the territory they wander. But it is feared the annual slaughter will have to be curtailed and the Indian department is now taking the necessary steps with that object in view.

One band of Indians, less than one hundred in number, killed several caribou last year. It was observed that no Indian was going to consume a hundred caribou in a season and officials of a treaty payment party on a visit to Lac La Poudre, held the caribou the evidence of killing being carried beyond all reason. Those Indians are going to have their share of the caribou to them that kind of slaughter will have to cease.

Market For Western Wheat

Many Canadian Farmers Taking Up Land In Western Canada

Most of the wheat Russia requires this year will come from Canada, according to a Johannesburg dispatch. The Russian food commission, which visited Winnipeg, on his way through the west to study crop and marketing conditions here.

Many European millers and grain merchants suffered such heavy losses during the slump in wheat prices from February to May this year that they will be afraid of making large contracts for next year he said. As the import trade in grain and flour to Russia is handled by the Norwegian government, Mr. Johansen explained, it is a natural measure, adopted during the war, and which the government still finds advisable to keep in force in view of the favorable agricultural conditions in the country. From 1914 to 1917 private importers as well as the government handled import trade of grain. In 1917 the government took it over entirely.

Alfalfa Is Good Horse Feed

Experiments Show Preference Against It Is Unfounded

An experiment conducted by the Michigan Agricultural College seems to show that to some extent the prejudice against alfalfa as a horse feed is not founded on fact. Horses which had fed alfalfa regularly for a year showed no loss of weight and good condition, and did just as much work at less feed cost than their counterparts.

Nine teams of horses, varying from 2½ to 14 years of age, were selected for the experiment. One horse of each team was fed corn and alfalfa and the other corn and timothy.

The alfalfa-fed horses consumed an average of 12½ pounds of corn and 17½ of alfalfa per day, while the others ate 8 pounds of corn and 6½ of timothy. It costs 21 cents a day for feed with the alfalfa-fed horses and 27 cents for the timothy-fed horses. The former gained an average of 21 pounds during the year, and their mates lost 17 pounds each.

The timothy is the shallowest, only 43 inches in average depth. Next comes the alfalfa, with an average of 42 inches in depth.

of a man until he has made her

W. N. U. 1294

Home Grown Seeds

Practice of Saving Seed Pods Will Prove Both Profitable and Interesting

Collecting and drying one's own home grown seed is a fascinating game, especially if care is taken to get the best varieties of plants and mark them in some simple fashion. The money saved may, then, go to ward toward the purchase of more plants. Even if the seedlings show the effects of lifting insects, they will carry the peculiar charm which belongs to the offspring from seeds developed in "one's own home garden."

Select a dry day for collecting seed pods and do not wait for them to burst before gathering. In some plants, ripening takes place all at once, while in others this operation extends over a month or more and only a few seeds can be gathered at one time. Probably the simplest method of trying to place in a separate bag and label. Removing their cases may then be done when convenient and the seeds may be stored in one or more of the most delightful ways of adding to one's store of plants and proving the quality of one's seeds.

Hungarians Buy Manitoba Farms

Former Colonel of Hussars Will Bring Family Out In Spring

Two Hungarian aristocrats will be settling Manitoba soil next summer.

Court Tass Pastry and Julius de Tass, the latter a former colonel of Hungarian Hussars, have purchased a section of land at Hazelburg, 40 miles from Winnipeg. They will remain in the city until the winter until next spring, when they will bring their family out to their new home. The former colonel will return to his native land to get his family. They both state they want to learn farming by experience and will do the work themselves.

Indications that Western Canada is going to have good crops of wheat and Hungarian was seen in the announcement that Baron Chassy, an officer retired from the Hungarian army, has purchased a 2,600-acre ranch between Calgary and Banff.

Swet Clover Improves the Soil

Has the Ability to Extract Nitrogen From Air

Nitrogen is one of the most essential plant foods as well as the most scarce. Sweet clover has the ability to extract nitrogen from the air and incorporate it into its tissues. It thus becomes, as Mr. Berck points out in his pamphlet on "Sweet Clover" (Pamphlet No. 56, of the Dominion department of agriculture), one of the most valuable improvers of soils. This legume improves on poor soils, producing an abundance of large, fleshy roots that decay readily and supply energy to the soil, thus improving the texture and providing better drainage and aeration. A bulletin published by the University of Illinois states that in the spring the roots weigh as much as the stems and that the nitrogen content is not much lower.

Exports Of Grain

Falling Off In Quantity But Small Decrease In Total Value

Figures showing exports of Canadian grain crops for the first five months ending July 31, 1925, reveal the interesting fact that, while exports fell off in bulk by over 20 per cent, value of exports showed a decrease of little more than 10 per cent. For the twelve months total exports of wheat, barley, oats and rye amounted to 215,702,347 bushels, having an aggregate value of \$27,261,424, whereas for the corresponding period of last year exports totaled 232,570,051 bushels of the value of \$28,248,568.

Find Stint In Ocean

A well preserved statue of antiquity was found in a cave off the coast of Marathon by a number of fishermen. The statue is of bronze and represents the head of a young man. Experts declare that the statue is extremely valuable and have compared it to famous statues of "The Youth of Antich."

Dominions Need Population

Rapid Progress Depends On Strong Immigration Policy

Continued and rapid progress in the Dominions depends upon the continued and rapid increase of their population, says the London Morning Post. Such increase can only be accomplished by means of inter-imperial migration. There are in this country a great many more persons than in the dominions of the empire can support. But before any large scheme of emigration can be carried into effect, it is necessary to ensure that new settlers in the Dominions shall be provided with a market for their produce. Great Britain is the best market in the world; and by means of a policy of preference the products of the Dominion may be given the advantage over foreign products. But, again, the possibility of emigration on a great scale depends upon the working of the Dominion's markets with this country. How essential it is to their populations with English stock the dominions have not yet fully understood. It appeared in the course of the parliamentary debate that by reason of duties on raw materials, 50,000 persons, approved by the authorities, are waiting to migrate.

British Boys For Alberta

Contingent of Boys for Training at Government Farm in Canada

Arrangements are now being made for bringing over this year's contingent of British farm boys for training at the Alberta Government farm schools.

Mr. George Howley has asked that they be here by the middle of October as the schools will open October 27. There is to be a maximum of 100 boys, and they will be recruited direct from England to the three schools at Vermilion, Olds and Claresholm.

Under the plan to follow this year the British lads will pay their own way at the schools, and the overseas government would not be required to provide Provincial Government on a monthly per capita basis.

It is anticipated the full quota will be reached without difficulty.

Plenty Of Flowers In Canada

Many Cultivated In England That Grow Wild Here

Lady Japer, who is an enthusiastic flower lover, wishes to transplant some Canadian flowers to her English garden and to that end sent her English gardeners to Canada to select some of these wild things. Recently at Jasper lodge, before a little audience invited to meet her, she spoke formally on the subject. She commented on the number of flowers which she said over in England were only to be found in gardens, and there were frequently cultivated at considerable cost, but which out here in Canada people literally trod underfoot.

She was so enthusiastic that she urged the members to cultivate rock gardens in Jasper. Her knowledge said it was satisfying how many people overseas thought that there were no flowers in Canada.

Saskatchewan Leads

With Registered Seed Has Three Hundred Growers Against

The field improvement of registered seed in the western provinces is now practically finished for the season. The number of fields is slightly increased from last year, although at first the applications were somewhat less. The number picked up on the way by J. Ingers, has brought the total well up. Saskatchewan leads with about 200 growers of registered seed. Manitoba has 135 this year as against 131 last season.

In Saskatchewan registered seed conditions were also hinged and, as the provincial staff of district representatives was working on this, the Dominion seed bank staff joined forces and pooled the work to avoid duplication of routes.

It is estimated from the trucks of the wheat, lupinose and a few other crops, as well as from the wheat.

Increased Taxation Must Necessarily Follow Demand For Better Public Service

New Profession For Women

Bird Shelters In New York Does Flourishing Business

Miss Estlin Steiner, niece of the late Dr. J. J. Henshaw, one of the founders of the French Hospital in New York, and for many years chief surgeon there, has the unique profession of bird sheltering. Receiving her medical training from her uncle, Miss Steiner applied her skill to feathered pets and has restored hundreds of sick birds to health during the last twenty-three years. She was the visiting physician on the staff of the late Mrs. Virginia Pope, well known bird owner, who maintained a home for birds in New York for many years.

At Miss Steiner's hospital and boarding home for feathered pets are birds of every kind, from various tropical ones. One bullfinch is slowly getting feathered again on his bald head, the baldness being due to an over-rich diet of the birds of a fond owner. A hand some green parrot that had been too weak to stand and had laid for days on the floor, is now on its feet again with a return to its previous appetite.

A trophy is recovering the use of a broken leg, and Miss Steiner's hospital is a place where birds are well cared for.

At the same time, while public spending in recent years has run away beyond all previous analogies, it has been back to the low taxes of 20 years ago, is including in an elusive dream. To get back to the way that people would mean to get back to the inferior school systems and the bad roads and the inferior public services.

Taxpayers are paying for more than they were and in many cases more than they should; but it should not be forgotten that they are getting more, too, and that in many instances what they are getting is worth the price.

Ignorant Of Canada

Former Ferguson Tells English Journalists How He Was Amazed

The married farmer with sufficient money to establish himself and the boy from the middle classes who are the kind of immigrants most desired, Premier G. H. Ferguson told a party of English journalists who were in Toronto in the course of a tour of the Dominion.

Mr. Ferguson told the journalists that when he was in England the thing that amazed him was the want of knowledge of Canada and conditions in Canada. "I found that people knew far more about Australia and New Zealand than they did of this country. We need you over here who really understand conditions in Canada."

Adjustable Water Wheel

Will Rise and Fall Any Height Up To 36 Feet

A water wheel has been invented which is designed to adjust itself automatically to the varying height of the propelling stream. As first constructed the wheel has eight V-shaped paddles about 12 feet long and 21 inches wide, and it is so mounted on an upright shaft that it rises and falls with the stream's changes through an height up to 26 feet. It is used for pumping irrigating water from a distance of 200 feet in a height of 75 feet above the source. Pumps and gear are placed on the river bank, and the wheel and tank are connected by a shaft having universal couplings at each end.

Reviving the Ancient

Flowers that bloomed in ancient Egypt 20 centuries before Cleopatra, and wheat and barley, taken into the royal tombs to sustain Pharaohs on their post-mortem travels, have been brought to Chicago by Prof. James Henry Breasted, noted Egyptologist of the Chicago University.

Silence is the only thing that will ever improve some people's conversation. Breasted is today enjoying life in an extensive programme of reformation.

Canadian Finance, of course, cannot expect to be considered

stiffness if they clamor for improvements in home birth and for lower taxes in the next, for no progress can be made in that way. What people get in the way of public improvement they may pay for, and they can't have everything they want and lower taxes too.

At the same time, while public spending in recent years has run away beyond all previous analogies, it has been back to the low taxes of 20 years ago, is including in an elusive dream. To get back to the way that people would mean to get back to the inferior school systems and the bad roads and the inferior public services.

Taxpayers are paying for more than they were and in many cases more than they should; but it should not be forgotten that they are getting more, too, and that in many instances what they are getting is worth the price.

This is an argument for extravagance. Extravagance with taxes is a wicked thing to do, even those whose hard work earnings contribute to the public treasury; and is not only directly burdensome, but is made indirectly burdensome by the poison of a demoralizing example.

Settlers From United States

Many American Farmers Taking Up Land In Western Canada

Recent news from Canada is a remarkably encouraging inspection of the various agencies in the mid-western, northwestern and southwestern states. J. Bruce Walker, superintendent of immigration in the United States, states that from April 1 to August 31, of this year, the number of farmers sent up from these states to settle land in Western Canada shows an increase of 15 per cent over the figures for the same period and from the same region last year.

It is stated, too, that from March 1 to August 31, of this year, the Canadian National Railways, the Canadian Pacific Railways and the Hudson's Bay Company, have received 1,000 new settlers in Canada in a similar period for the past ten years.

"I found that people knew far more about Australia and New Zealand than they did of this country. We need you over here who really understand conditions in Canada."

Borrowed Fashion

Indian girls on the Glacier National Park reservation hold their hair just like the pale face city misses. They are, of course, one of a hue that blends with their copper colored complexion. But the criticism of their hair is not for them from their hair which they gather on the wooded slopes of the Rocky Mountains. It is the fact that these Indian girls get it granted that the pale face girls get the idea of check and the Indian girls get the idea of the reason, just as the Indian girls took the hair hugging habit from their "white sisters."

Time For Best Work

Tests performed on 112 students at Cornell University, Ithaca, N. Y., last fall, indicate that the average student does his best work at 8 a.m. and the poorest work at 4 p.m. The best day is the best day of the week and Saturday the poorest.

First Census Ago

Until two years ago no census of the population of Palestine had been taken since the time of Babylon. In 1923 there were 3,279,745 Jews in the country; today the total is estimated at 168,000.

Ask Toronto Sales for Included Easy Terms
Now Everyone Can Have Delco-Light
A Price Thousands Have Waited For

NOW everyone, anywhere, can have the conveniences and savings of electric light and power. This new Delco-Light plant is offered at an amazingly lower price than any Delco-Light plant was ever offered before. It can be bought on terms so easy that no farm family need be without the wonderful benefits of electricity any longer.

A Revolutionary Low Price

This new Delco-Light plant is a genuine Delco-Light—backed by the satisfaction of over a quarter-million Delco-Light users. It is a non-storage battery plant, equipped with a standard Delco starter and an economical starting battery. It has full 600-watt capacity—is strong, sturdily built, economical in operation. And its price is only \$255 f.o.b. Toronto—the most sensational price and the most startling value ever offered in a Delco-Light plant.

Made Possible by Delco-Light

For months we have been working on the development of this new Delco-Light. Our years of experience as the world's largest

manufacturers of farm electric plants have enabled us to design a plant which will give dependable electric light to any home. And our enormous manufacturing facilities enable us to build this plant at the lowest possible cost and to sell it at an amazingly low price.

A Small Down Payment—Balance on Easy Terms

This new Delco-Light Electric plant can be paid for on terms so easy that anyone can take advantage of them. Even though the cost is only \$255 f.o.b. Toronto, you need make only a small down payment.

Never before has such an opportunity been presented. Never before has Delco-Light cost so little and been so easy to buy. It means that any farm home—your home—can have Delco-Light today.

Send Coupon Immediately

Write immediately for full details of this remarkable offer, specifications of the plant and figures which show how easily you can get this great convenience. Sign and mail the coupon now. It puts you under no obligation.

Another PRICE Suggestion
Biscuits, Buns and Rolls

DISCUIT! What delight this word suggests. So tender they fairly melt in the mouth, and of such glorious flavor that the appetite is never satisfied. These are the kind of biscuits anyone can make with Dr. Price's Cream Baking Powder and these unusual recipes:

(All measurements for all materials are level.)

BISCUITS
2 cups flour
4 teaspoons Dr. Price's Cream Baking Powder
1/2 teaspoon salt
1/2 cup milk or half milk and half water

Sift together flour, baking powder and salt, add shortening and rub in very lightly; add liquid only to make soft dough; roll or pat out on floured board to about one-half inch in thickness (thinner as brittle as possible); cut with biscuit cutter. Bake in hot oven 15 to 20 minutes.

CINNAMON BUNS

2 1/2 cups flour
1 teaspoon salt
1/2 cup milk
1/2 cup water
1/2 cup sugar
1/2 cup butter
1/2 cup cinnamon
1/2 cup raisins

DR. PRICE'S CREAM Baking Powder

Made from Cream of Tartar, derived from grapes. Pure, wholesome and unvarying in strength. Raises the dough perfectly.

MADE IN CANADA

Sift 2 tablespoons of measured sugar with flour, salt and baking powder, rub shortening in lightly; add butter to water and add slowly. Roll out 1/4 inch thick on floured board; brush with melted butter, sprinkle with sugar, cinnamon and raisins. Roll as for jelly roll; cut into 1 1/2 inch pieces; place with cut edges up on well-greased pan; sprinkle with a little sugar and cinnamon. Bake in moderate oven 30 to 35 minutes; remove from pan as soon.

PARKER HOUSE ROLLS

4 cups flour
1 teaspoon salt
1/2 cup milk
1/2 cup butter
1/2 cup sugar
1/2 cup raisins

Sift flour, salt and baking powder together. Add melted shortening to milk and add slowly to dry ingredients stirring until smooth. Knead lightly on floured board and roll out to 1/4 inch thick. Cut with biscuit cutter. Grease each circle with butter and fold larger part well over the small. Place one inch apart in greased pan. Allow to stand 10 minutes in warm place. Brush each with melted butter and bake in moderate oven 15 to 20 minutes.

Alchemy And The Atom

Reconstruction of Civilization May Be Necessary Through Advancement of Science

Man has been able to imitate nature in a microscopic way in the laboratory and thereby has gained much knowledge. He can produce artificial lightning and thunder, he can generate heat equal to that given out by the sun, he can transform metals, he can break up the atom. But it costs too much to do any of these things, and so far as known nature does not all without half trying and without slowing up. A German chemist produced gold from mercury, but he had to explain that it would cost to do \$200,000 a ounce.

Dr. Gerald L. Wundt, of the department of physics and chemistry at Pennsylvania State College, told a scientific gathering of his experiments in converting atomic energy, and expressed the belief that the power of the atom would be at the disposal of man if this prediction comes true. It will mean the reconstruction of civilization through a new energy that will make industry independent of coal and even hydro-electric power.

Dr. Wundt placed a tungsten wire in a vacuum tube through which he sent a current, with the result that more energy came out than went in, and the tungsten was transformed into hafnium. But to bring this about he had to raise a temperature of 60,000 degrees Fahrenheit. The tungsten, on the other hand, as the scientist admitted, is much higher than the sun's heat and 20,000 degrees hotter than the hottest star.

Just now it costs immensely more to release fully the energy within the atom than the return. On the other hand, that of universal ethics, it might be dangerous to turn over to man in his present state of knowledge, the whole secret. He has not yet paid the obligations placed upon him for his fall. "In the sweat of thy face, shalt thou eat bread."

Evidence That Europe Was Cradle Of Man

The skull of an ancient Gaiian who lived at Capernaum some 25,000 to 30,000 years before miracles began to be performed may be taken as evidence that Europe was the cradle land of both man and of his culture. Sir Arthur Keith, famous anthropologist, found the British Association for the Advancement of Science.

The skull of a little Sir Arthur spoke, a model of which he has taken to his bedside. This, he discovered by Francis Turville-Petre, of the British School of Archaeology, a few months ago, was one of the most important of the ancient city of Capernaum, where Christ performed many of his miracles.

Proud Of Combination

Phone Girls in London Hotel All Have Red Hair

Someone has just discovered that all the girls in the telephone exchange of the Hotel Savoy, London, are red haired. Why? Well, it seems to have happened, though a Harley physician, when confronted with the interesting problems that the situation suggested, said it had been found that red haired people were more than usually proud of their hair color.

At any rate, the eight young women who spend their days answering the flashing summons of Indian princes and American millionaires are extraordinarily proud of their hair color, and they are now familiar with the taste of meat and food that they must have it.

Gave Him His Start

The physician's son was entertaining his playmate at his home. They were playing at being doctors. The son unlocked a door and disclosed a skeleton to the terrified gaze of his playmate. "It's nothing to be afraid of," he said. "It's only an old skeleton." "Who-where did it come from?" quavered the other. "Oh, I don't know. Papa's had it in his time. I expect it was his first patient."

He Did

A farmer who was busy sent a message to a neighbor with a hastily scribbled note requesting the loan of a donkey.

When the neighbor received the note he also was very busy, and had no time to decipher the bad writing, so he told the messenger:

"Tell your master that I will come myself."

He—"There's a certain question I've wanted to ask you for weeks."

She—"Well, ask it. I've had the answer ready for weeks."

W. N. W. 1934

Old Curriculum Will Not Surrender Prestige

Reading, 'Hitting and 'Himself, Being Better Taught Than In Former Years

The old-fashioned, bespectacled looker who could add a column of figures at lightning speed was a figure considered something of a wonder in his time. He could add, subtract, multiply and even uncannily accurate. He could do it all with a pen and a piece of paper. He could do it all with a pen and a piece of paper. He could do it all with a pen and a piece of paper.

Nevertheless the threat of the "R's" in the old school curriculum is not quite ready to surrender its prestige in the new mechanical order of things. As a prelude to higher mathematics for the future high school and college student or the better paid trades and positions, it is as indispensable as ever. Superintendent of School McArthur found, too, that it was as valuable in itself as any other subjects.

A canvass of thirty-five persons in the business world, from accountants to contractors, architects and salesmen, revealed a very decided opinion that the grade school curriculum was still the best. In developing accuracy and reliability among the pupils.

In June, 1932, Superintendent McArthur administered the same test to the pupils in the grade school. The results were as follows: The average of all the papers was 78.4 per cent, and 112 per cent of the papers scored 100 marks of the grade school paper. The lowest average of all the papers was 62.2 per cent, and the highest 82.2 per cent.

Visual education may at times seem to be a waste of time, but the results of the test would indicate that the "Three R's" of the school curriculum are being just a little better taught than fifty years ago, despite the great diversity of "modern school curriculum."

Would Eat Raw Meat

Japan to Experiment on Raw Product For the Diet

With the popular appetite for meat steadily increasing in the last few years, it is now proposed to experiment on the raw product for the diet, according to Dr. Iwa Tanamura, special government food commissioner, who is in the United States gathering data in the interests of an economical meat supply for his nation. Dr. Tanamura has conferred with officials of the national livestock and meat board, and other authorities of the industry.

"We have long been accustomed to eating our fishes raw, so why cannot meat be used in the same way?" is the logic offered by Dr. Tanamura. "Of course, we are not prepared to say as yet whether raw meat will be practical, but we are at least considering the possibilities."

The Japanese are learning more about the food value of meat products, calves, etc., said the visitor. They can do very well without corn, milk and a number of other foods, but they are now familiar with the taste of meat and food that they must have it.

The Problem is, to Supply Meat at a

sufficiently low price to be available to the masses. The problem for the world to-day is, he said, but because of low wages the cost is often prohibitive for the laboring classes. In the face of this situation it seems that all classes have now come to the realization that meat is the necessary food element to keep the bodies fit.

Asked if religion in any way interferes with meat consumption in Japan, the doctor was emphatic in his negative reply.

He pointed out that in the consumption of meat, the Japanese are very economical. They eat it all and there is no waste to be compared to the garbage can. It is interesting to note that they do not make use of it in soup, as is done in America.

Professor—"What makes you think that they had plenty during the stone age?"

Assistant—"I just discovered a never penny butter sandwich."

Noted peasant boy trides. The hole that lets the water into your shoe will let it out again.

Communism In Insect Life

Entire Giving Up Of Life of Individual For Community

The human socialist is told to go to the ant to learn industry. The human sociologist might be told to go to the ant to learn socialism. The human sociologist might be told to go to the ant to learn socialism. The human sociologist might be told to go to the ant to learn socialism.

They live in all the lands of the earth, in extreme Arctic and Antarctic regions, and on the summits of lofty mountains, and their numbers probably exceed those of all other insects. They have been called the most successful of insect kinds. But are they happy? Nobody knows.

Gold Found By Diving Rod

Patric Innocente de Plovera, a Capuchin monk who is reputed by mountain folk to be gifted with supernatural powers, was searching for water with a diving rod in the Argentine Mountains recently when the rod indicated the presence of gold. Peasants started digging and found gold-bearing quartz which assayed four grams of gold and 14 grams of silver to the ton and a company has been patented a new anti-collapse device.

Settlers From Ireland

Forty-nine Irishmen, in charge of M. Mulahy, have arrived in Northern Alberta and will be located in the Edmonton district. The party came from Cork, Limerick, Carlow and Dublin counties. Archbishop O'Leary and other clergies and officials of the archdiocese have undertaken to see that the newcomers are given every chance to make good.

Immortality of War

Scientific Mathematical Certainty That Nobody Dies Entirely

Professor Charles Henry of the Sorbonne, one of the leading mathematicians of France, declared that he had proof of the scientific mathematical certainty that "nobody dies entirely."

Saying religious had sought to explain the phenomenon of death and to promise the infants prolongation of life, Prof. Henry went on: "Among scientists there are men for measuring the radiation of all substances—for everything emanates radiation, your lamp, your stove, your cherry tree are warmed by the sun's rays."

Calculate that radiation, which is due to heat, due to electro-magnetic elements and due to the attraction of our globe. If you make the calculations conscientiously, you will with astonished surprise find yourself up against something unknown, something which is neither one or the other of these.

"Repeat 'en times ten hundred times, and calculate your many long nights—always you will discover this hidden power which manifests itself, but remains utterly elusive, an ideal fluid, defying all the scales and microscopes in the world, but always present with obstinate constance."

"When bodies die, they are far too subtle an order to pre-occupy themselves with the psycho-chemical process of death. What happens to them? As they cannot disappear, they must proceed elsewhere to find another envelope in order to recover the balance and stability of temporary harmony."

"That little something which gives you a distinctive personality among the millions of your fellow-beings is immortal. You hand your 'soul' on to others, that's all."

Make Train Collisions Impossible

A collision of locomotives would one day be impossible according to a German engineer, Helms Hart, who has patented a new anti-collapse device. A magnet is built into the rails near signals, and when a train is to halt the magnetic current in the rails intensifies the influence of a magnet in the locomotive, which automatically cuts off the steam.

Lawyer: Then I understand you to say, witness, that the parties came to high words?

Witness: No, sir; what I say is, the words were particularly low.

An Interesting Experiment

Believe That Mosquito Bites, Causing Malaria, Is Cure For Inanity

Malaria mosquitoes are being used at Exton mental hospital in England to infect patients suffering from general paralysis of the insane to determine if the resulting malarial fever will alleviate or cure their inanity. The treatment was developed on the continent, where it is claimed that the shock of malaria acts on the organism of the spine and brain that are responsible for paralysis, destroying their vitality.

Infection is conveyed through the bite of a mosquito. A patient is taken into a room with double doors and windows. Mosquitoes are released from a box in which they are returned after they have bitten the patient. For the malarial fever that develops, the patient is given the ordinary treatment.

Exton is the first British hospital to try the experiment. The reaction of the paralyzed insane to malaria was first observed when an epidemic of malaria in a European asylum left many of the patients materially improved.

Sunlight Good Brain Food

Mental Tests Show Progress Exposure Increases Intellectual Output

In addition to their beneficial effects, the rays of natural or artificial sunlight are declared to serve the purpose of a brain food, according to Sir Henry Guvian, a British surgeon. Progress exposure to sunlight, he says, if carried out in a rational and unobstructed way, increases the intellectual output, and is as good as proof, comparative mental tests made on two groups of children in two different London hospitals. Those who were receiving special treatment at one institution where sun exposure was regularly given, manifested such great mental superiority over another group not so treated that the difference could be credited only to the sunlight effect.

London Has Gloom Club

Place Where People Can Discuss All Their Troubles

In London the latest thing to be going on is a "Gloom Club." There one need no longer make any secret, but may proclaim one's woes and groanings to the, for the nonce, sympathetic audience. High and the world, you weep and you weep in company, that is, if one is not afraid of damp or mildew.

The club is in the intervals of sad talk, the clubs arrange excursions to graveyards. No mention is made of death, but perhaps that would be getting in too thick. The meeting places, so says the account, are draped in funeral colors, but again it would seem that certain pleasures, such as horse hair trousers, are being overlooked.

The club of the club is not a new one. Such organizations flourished a century ago when social historians record that hostesses of the divines of "divine melancholy" there were those for ugly persons or for divines—elected or nominative. Evidently coincident with the last of these was that there was even a "split (splitting club) where the members met to exchange confessions of how they had contrived to save an eighth of a cent. At another one, known as the "Unfortunate Club," gathered the unappetizing married, bankrupts and those who lost on the races. This club probably had a waiting list—The Manitoba Free Press.

Eating Your Weight In Salt

Over 800 Million Pounds of Salt Produced in Canada Annually

Did you use your hundred pounds of salt last year? If not you did not get your share for, according to the natural resources intelligence service, there are over 800 million pounds of this necessary substance used or sold by producers in Canada annually. Even then we use less than the citizens of the United States, for in 1924 they consumed 100,000 tons, and took pounds per capita and have been known to consume as high as one hundred and twenty-seven pounds.

Practically the whole of the Canadian production comes from near Windsor, Ontario, although the Melara deposits of Nova Scotia are becoming of increasing importance to the fishing industry especially. The Ontario deposits sometimes reach a thickness of 250 feet. Despite these splendid mines almost half of the salt used in Canada is imported.

British Columbia Minerals

The mineral deposits of British Columbia continue to command the attention of capitalists, particularly those in the United States where the bulk of the capital for the development of the natural resources of the province has been derived. English and Eastern Canadian capital is also paying attention to the mineral resources of British Columbia.

Streams of colored paper often are used to illustrate graves in China.

SKI-ING IN MIDSUMMER AT JASPER PARK

Fair lovers of winter sports gathered on the Carvel Glacier at Jasper National Park on August 21, for a tryout on the ski slides. From left to right: Miss Flora MacDonald, Edmonton, Alta.; Miss Erika Nolin, Toronto; Miss Peggy Armour, Perth, Ont.; Miss Marjorie Neal, Toronto; Miss Marie MacDonald, Edmonton; and Miss Marjorie Greene, New York City.

THE COMFORT OF IT

If you haven't a hot water heater in your home you do not realize what a comfort you are missing. Think of it! Hot water in abundance the moment you turn the faucet. The heater is not expensive and the installation is quickly done. Let us explain it to you. You'll be satisfied until you have one.

Foolish Saving

A penny saved is not always a penny earned. Sometimes it is two pennies lost. The merchant who spends nothing on advertising loses much more than he saves.

The money spent for plate glass windows is not looked on as lost; nor is the money spent on better interior lighting.

Anything that increases the favor, that adds sales, that multiplies customers is very properly regarded as a good investment.

Advertising is a good investment—just as plate glass windows are. Advertising sells more goods to more persons than shop windows do.

A WORD TO THE PUBLIC

Do you resent having a merchant address his message to you in the form of an advertisement in our columns? On the contrary, is not your impulse to respond to his friendly overtures?

Clareholm Local News

Bethel United Church

On Sunday morning at 11 o'clock the pastor will continue the theme introduced last Sunday morning, "Making our home-Christians a practical gospel message for present-day life."

In the evening at 7:30 o'clock the Rev. H. D. Marr, B.A., of Calgary, district secretary for the Bible Society, will give an illustrated address commemorating the 40th anniversary of the translation of the Bible into the English language. A special set of valuable slides gathered for the purpose, will be used in illustrating this interesting address. A hearty welcome for all at these services.

The regular mid-week service for prayer and Bible study is held in the lecture room each Wednesday evening at 8 o'clock. All interested are cordially invited to these mid-week services.

Nazarene Church Announcements

Y. P. meeting tonight. The Rev. A. H. Eggleston, B.A., pastor of the Lethbridge Church of the Nazarene, will be the speaker. Rev. Eggleston is bringing us a number of good sermons. It is looked forward to his staying over Sunday.

Bro. Eggleston is an old time preacher of an old time gospel; salvation for the sinner and sanctification for the believer. See Romans 15 and 16.

Four Square Gospel

Meetings conducted by Evangelist R. A. Reynolds, and wife, in Odd Fellows' Hall, Sunday, October 11th.

11 a.m., worship.
3 p.m., the great image and the four beasts.

7:30 p.m., The greatest thing in the world. What is it?

Nebuchadnezzar dreamed of a great image, with head of gold, breast of silver, loins of brass, legs of iron, and feet of iron and clay. Daniel has a vision of four strange beasts. What do they mean? Have they anything to do with our day? You will be surprised. Come and hear about it. We believe in an unchanging Savior, who heals the sick today in answer to the prayer of faith. Come and hear the testimonies of healing. Sick prayed for at any service. Everybody welcome.

Death

On Friday night, September 25, the death occurred of Mr. M. B. Rozander, in his 70th year, at the Clareholm hospital, from cancer, having been ailing more or less for the last two years.

Mr. Rozander came to Alberta in 1906 and homesteaded 10 miles east of Carmangay, coming from Sackville, New Brunswick. He was born in Mapleton, Nova Scotia.

His surviving relatives include his wife, two daughters, Mrs. Forrest of Winnipeg, and Mrs. Norman Greene; three sons, Charlie, John W. and Ketter B.; a brother, Robert Rozander of Trail, B.C. The community extend their sympathy.

Card of Thanks

Mrs. M. B. Rozander and family wish to express their sincere acknowledgement of the help and sympathy of their friends and neighbors in their sad bereavement.

BUSINESS LOCALS

Came Across Continent in Motor Boat

Completing all but the last lap of their trip from Los Angeles to New York—across the whole continent—in an eighteen foot long motor boat, two Americans, John Edwin Hoag and Frank S. Willan, not to mention Spay-Wapato, their dog, arrived recently in Montreal and stayed for a day or two before proceeding to New York.

The entire distance was covered by water with the exception of one portage of 400 miles from Cello Falls, Washington to Fort Benton, Montana. Their boat, the "Transcontinental," is an 18-foot craft, 3 feet beam, and powered with two four horse power Evernude outboard motors. They left Astoria, Oregon, May 20, after having their boat shipped on the coast from Los Angeles. The route was via the Columbia River from its mouth to Cello Falls where the boat was loaded into one of the 400 mile portages to Fort Benton where the journey was resumed down the Missouri River for 2,280 miles into the Mississippi to St. Louis, then on the Mississippi to the Illinois River as far as Ottawa, Illinois, through the Illinois and Michigan Canal to Joliet, Illinois, and through the Chicago Drainage Canal into Lake Michigan. From here the voyage was plain sailing to Montreal, where they landed at the "Montmain."

Minors, Hoag and Willan followed in reverse direction the course of the early explorers, Columbus, Hendrick Hudson, Champlain, Cartier and La Salle. Their mishaps commenced early when, in the Columbia River they ran foul of a sunken log boom tore the stern out of their boat. After this misadventure, which they finally weathered safely, storms and risky runs down little-known rapids, which might naturally be expected.

There adventure is unique, the only attempt previously made being about 18 years ago when a similar expedition ended at Bismarck, North Dakota after traversing the same route. Then, however, the adventurers were so held up by adverse conditions that they were overtaken by winter and their boat was crushed in the ice.
